WELCOME

TO OUR COMPANY PROFILE

TECHNICAL HUB has established itself as one of India's leading industry-oriented skill development ecosystems, with a mission to bridge the gap between academia and industry. Since its inception in 2016, the organization has evolved beyond a conventional training center into a comprehensive technology, innovation, certification, and career acceleration platform, impacting thousands of students and professionals

Building skilled careers. Creating better tomorrows.

Every figure in this brochure is taken from the Technical Hub presentation deck and from the records behind it — the certification register, the placement archive and the film library. Nothing here is an estimate.

01 — Who we are

NOT A TRAINING CENTRE. A CAREER ECOSYSTEM.

Technical Hub was started inside a university campus with one blunt observation: a graduate can hold a good degree and still be unable to do the first day of the job. Everything built since has worked on that single gap — certify the skill the industry actually hires for, make the student build something real, then put them in front of the companies.

The ecosystem now runs programmes, vendor academies, a certification register, placement drives, an in-house product stack and an AI practice. It is operated from one campus and it is designed to be transplanted onto another.

The record, in short

- 10 years of successful operations
- More than 22,000 LinkedIn followers, reflecting a growing professional community.
- 16,000+ global industry certifications earned by learners.
- Continuous student success in premium certifications such as RHCSA, ServiceNow CAD, Oracle, AWS, Cisco, Microsoft, Salesforce, Red Hat, GitHub, Google, Unity, Adobe and many others.
- Expansion into enterprise AI consulting through Claude Center of Excellence initiatives.
- Strong ecosystem built around Project Space, involving over 900 students in AI-driven innovation projects.

MISSION

Bridge the gap between academia and industry, so that a student from any background leaves campus employable on day one.

METHOD

Industry certification, project-based learning and relentless placement practice — measured, published and repeated every cohort.

REACH

Built for students from rural and tier-2/3 backgrounds, who make up most of the intake and most of the offers.

02 — Founder & CEO

BABJI NEELAM

FOUNDER & CEO · TECHNICAL HUB · TORII

Building skilled careers. Creating better tomorrows.

Every engineer has a story. Mine runs from a small town in Andhra Pradesh, across three continents, and back home again — to build the bridge between campus and industry.

CHANGE MAKER | AI INNOVATOR | PROBLEM SOLVER | DREAM BIG | LEAVE A LEGACY

In his words

"The students here are as good as any in the world. They don't need charity — they need a bridge to industry. That is what we build, every single day."

WHERE TO FIND THE WORK

MENTORING

ON STAGE

03 — Leadership journey

LEADERSHIP JOURNEY
BABJI NEELAM

A Decade Covering 3 Continents — from enterprise engineering in Australia and Switzerland, through a decade of global delivery, to building a skilling ecosystem back home.

01

IBM

TECHNOLOGY FOUNDATION

Software Engineering

Babji began his technology career as a software engineer, gaining hands-on experience in enterprise technology and software development. His early international experience included working with banking systems in Australia and Switzerland, building the technical foundation that would later shape his leadership approach.

ENGINEERING | TECHNOLOGY | GLOBAL EXPOSURE

02

WIPRO

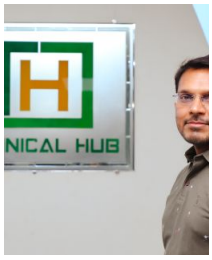

GLOBAL LEADERSHIP

Project & Technology Leadership

After building strong technical expertise, Babji moved into leadership and project management at Wipro, where he spent around a decade. Working across complex technology environments strengthened his capabilities in delivery, teams, execution, problem-solving, and leadership.

LEADERSHIP | EXECUTION | GLOBAL DELIVERY

03

2015–2016

ENTREPRENEURIAL VISION

The Birth of TECHNICAL HUB

After more than 12 years in IT, Babji made a deliberate decision in 2015 to leave the corporate comfort zone and return to his roots in Andhra Pradesh. His purpose was clear: bridge the gap between what industry needs and what academia teaches. After months of research, planning and preparation, TECHNICAL HUB was officially started on 2 February 2016.

COURAGE | PURPOSE | ENTREPRENEURSHIP

04

2016–2025

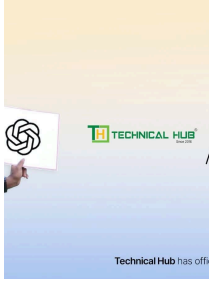

ECOSYSTEM BUILDER

From Vision to Impact

What began as a vision to connect academia and industry evolved into a broader technology and skill-development ecosystem. TECHNICAL HUB grew around industry certifications, practical learning, projects, placements, technology partnerships and innovation, reaching thousands of students — particularly from rural and tier-2/3 backgrounds. His 2026 reflection highlights the impact: students from the ecosystem have progressed into companies including Google, Amazon, Walmart, Cisco, Flipkart, Myntra, Airbus, DBS Bank, AWS and AMD, among others.

SCALE | OPPORTUNITY | INCLUSIVE GROWTH

05

2025–PRESENT

AI & INNOVATION LEADERSHIP

AI • Innovation • New Ventures

The next chapter moves beyond traditional skilling toward AI, innovation and enterprise transformation. Babji's recent leadership journey includes the evolution of TECHNICAL HUB's AI ecosystem and its official Anthropic Claude Partner milestone — an opportunity he attributes to years of consistent preparation, experimentation and perseverance. Alongside this evolution, he has also begun a new entrepreneurial chapter with Torii, describing it as a new space for new challenges, new places, new innovations and new dreams.

AI | INNOVATION | TRANSFORMATION

04 — Development history

TEN YEARS OF BUILDING CAREERS.

From a single observation about graduate employability to a campus-wide skilling ecosystem — the first six years.

2015 — 2020

2015
VISION & FOUNDATION

Identified the gap between academic learning and industry requirements
Planned an industry-focused skill development ecosystem

2016
TECHNICAL HUB FOUNDED

Started at Aditya University (3 February 2016)
Initial focus on programming and technical training
Industry certification initiatives introduced

2017
BUILDING STRONG FOUNDATIONS

Coding culture established
Technical workshops and hackathons
Campus-wide skill development programs

2018
INDUSTRY INTEGRATION

Global certification ecosystem expanded
Industry-oriented curriculum
Placement preparation initiatives

2019
INNOVATION & PRODUCT DEVELOPMENT

Student innovation encouraged
Internal software development
Real-time project learning introduced

2020
DIGITAL TRANSFORMATION

Online learning ecosystem
Virtual training programs
Remote certifications and coding assessments

04 — Development history

AND WHAT COMES NEXT.

Career readiness, an AI practice, the Anthropic Claude partnership, and the decade the organisation is building toward.

2021 — VISION 2030

2021
CAREER READINESS

Mock interviews
Communication and aptitude training
Strong placement support ecosystem

2022
FUTURE-READY LEARNING

AI and Data Science initiatives
Cloud Technologies
Automation
Emerging Technologies

2023
ECOSYSTEM EXPANSION

OwlCoder strengthened
Drive Ready launched at scale
T-Shaped Engineer framework
Large-scale certification programs

2024
ENTERPRISE SKILL DEVELOPMENT

AI-powered learning
Project-based education
Microsoft, AWS, Cisco, Red Hat, Oracle ecosystem growth

2025
AI TRANSFORMATION ERA

Generative AI adoption
Agentic AI learning
GitHub Copilot
Enterprise AI solutions
Claude Center of Excellence announced

2026
10 YEARS OF EXCELLENCE

Project Space Season 8 (AI Version)
AI-first innovation ecosystem
Enterprise AI consulting
Anthropic Claude partnership
AI deployment & production solutions
Future-ready workforce development

08 — Placements

WHERE THEY WALKED IN.

Campus drives, open drives, and the offices our students walked into — each record shown at its own proportions, company by company.

3
PLACEMENT JOURNEYS
One student, one timeline, start to offer.

35
CAMPUS PLACEMENTS
Placed through campus drives

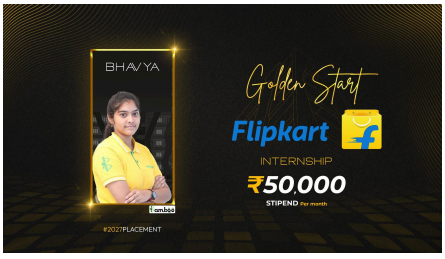

25
OPEN DRIVES
Selected through open drives

34
INSIDE THE COMPANIES
Photographs sent back from the offices they joined.

COMPANIES OUR STUDENTS HAVE JOINED

GOOGLE	AMAZON	WALMART	CISCO	FLIPKART
MYNTRA	AIRBUS	DBS BANK	AWS	AMD
SERVICENOW	WIPRO + SERVICENOW	DRAWINBOX	HITACHI	GE
VERIXZO	PEGA			

Named in the Leadership Journey record and evidenced by the photographs returned from those offices. 97 placement records are published in the deck.

09 — Events & campus life

NINE YEARS, ON FILM.

Every film Technical Hub has published, in six chapters — the anniversary reels first, because they are the whole arc of the place.

7
THE JOURNEY
Nine years, told by the films made at the end of each of them.

41
EVENTS & ARENAS
Project Space, T-News, Gitex and the days the whole campus turned out.

25
PROGRAMS
Every programme that runs here, filmed as it ran.

5
CENTERS OF EXCELLENCE
Inside the vendor academies — Red Hat, Pega and Mile2.

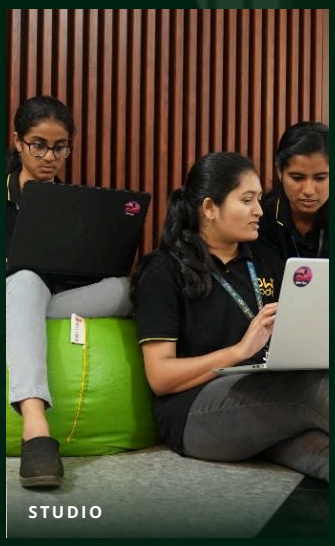

7
THE TEAM
The people who run it, and the days they compete.

6
TECHNICAL HUB AI
Robots, avatars and the assistants built in house.

HIGHLIGHTS

- 200-hour learning journey
- Taught by AI-certified experts
- Internship completion letter
- Industry-ready engineers
- AIRE learning platform
- Real AI projects

WHAT A STUDENT WALKS AWAY WITH

- **Not a fast-track program**
  A steady, deliberate pace — time to absorb every concept properly.
- **Authorised AI certification**
  Earn the authorised Claude Certified Associate credential.
- **Trained by certified experts**
  Industry-ready, AI-certified practitioners teach every module.
- **Internship completion letter**
  Issued and signed off by our AI partners.

WHAT THE CAMPUS GAINS

- **Claude & OpenAI Centre of Excellence**
  An official AI centre established on your campus.
- **Industry-ready AI engineers**
  Graduates who arrive at interviews already able to build.
- **Enhanced college branding**
  Association with the AI partners setting the standard.
- **AI ecosystem on campus**
  Tools, platforms and practice embedded in day-to-day teaching.

11 — Platforms we built

BUILT TO DELIVER.

The ecosystem runs on software written in house. Learners practise, submit and are assessed on platforms the organisation owns — which is why the record behind every number in this brochure can be produced on request.

01 

MYNA
The learner portal.

myna.toriiminds.com

05 

TAG
The NCET task and activity system.

tag.ncet.co.in

12 — Academic partnership

WHAT A CAMPUS SIGNS UP FOR.

An MOU with Technical Hub puts a working skill-development ecosystem onto your campus — the vendor academies, the certification pipeline, the project culture and the placement machinery, run by people who have done it for ten years.

01

VENDOR CENTRES OF EXCELLENCE

Authorised academies from the platforms industry actually runs on — Claude, AWS, Oracle, Red Hat, Microsoft, Cisco and ServiceNow among them — stood up on your campus under your name.

02

A CERTIFICATION PIPELINE

Cohorts prepared, entered and tracked through global exams, with the register published batch by batch rather than claimed in the abstract.

03

PROJECT-BASED LEARNING

Project Space and the programme ladder, so students graduate with shipped work rather than a transcript alone.

04

PLACEMENT MACHINERY

Mock interviews, aptitude and communication training, campus drives and open drives — plus the video-resume practice that puts a face to every CV.

05

AN AI PRACTICE, NOT AN AI MODULE

The AI Ready Engineer programme, the Claude and OpenAI partnerships, and a Centre of Excellence your students build inside.

06

BRANDING THAT TRAVELS

Your campus named in the certification register, in the placement record and in the films — the evidence an admissions office can actually show.
